

with so much these days with nothing better to do than think up new laws affecting truck drivers, and i do realize you know best when im tired and need to rest, but to interfere with any notion of xm radio and its broadcast is truly demonstrating you should get behind the wheel of an 18 wheeler. thier local traffic and weather broadcasts are such an improved way of increasing saftey and appears to be much more informative and accurate than trying to find a local channel that decides WHEN they want to make such broadcasts. thank you for your attn, roy ohse, registered republican!
